

THIS IS HOW WE PARTNERED WITH

**MTS Logistics**

WE DEVELOPED THEIR

# Mobile & Desktop App

My-MTS is an SFL developed mobile & desktop application that provides shipment tracking, analytics dashboard, sailing schedules, quote requests, and a marketing platform for MTS clients to view news and blog articles from the palm of their hands.

WE FACILITATED A

# Finance System Audit Report

SFL conducted an internal audit of the company's use of CargoWise One ERP to create a GAP Analysis Report, identifying gaps, areas of improvement and recommendations for maximizing system usage and ROI on the ERP investment.

WE CREATED A

# Realignment Of their Finance Structure

Financial organizational structure is paramount to business success. Together with the company leaders, we strategized initiatives to transform and re-envision the business process to align with the overall company strategy.

WE PROVIDED

# Back Office Staff

Our BPO staff handle all back-office related tasks. They are the support personnel who handle exceptions in automations, record maintenance, and oversee data entry management.

AND

# Helpdesk Support

Helpdesk support consists of a ticketing portal where clients can receive real-time support regardless of time zone. We cover a range of issues in various modules in CargoWise such as Forwarding, Finance, Registry Settings, Security Rights or Workflow.

If you are a logistics service provider looking to digitize and optimize your business process, feel free to book a consultation call with us:
